

## Data Center SSDs

Leveraging state-of-the-art BiCS FLASH™ 3D flash memory with in-house designed controllers and firmware, KIOXIA data center SSDs are designed for cloud-based applications running on scale-out cloud and traditional server deployments. These data center SSDs are optimized for a balance of performance, low latency and data protection, and provide power loss protection (PLP)<sup>\*1</sup> to safeguard data in case of unexpected power loss.

\*1 : PLP (Power Loss Protection): In case of an unexpected shutdown, PLP allows data recorded in buffer memory to be written to flash memory, utilizing back up power from solid capacitors.

\*2 : Optional security features

- Drive models with different security options have different model numbers.
- CD8 and CD8P Series security options: Sanitize Instant Erase (SIE), Self-Encrypting Drive (SED) optional models are available.
- CD8 and CD8P Series: SED optional model supports TCG Opal and Ruby SSCs. It has a few unsupported features of TCG Opal SSC.
- XD7P Series security option: Self-Encrypting Drive (SED) optional model available.
- XD7P Series: SED optional model supports TCG Opal SSC except for some features.
- SIE optional model supports Crypto Erase, which is a standardized feature defined by the technical committees (T10) of INCITS (the InterNational Committee for Information Technology Standards).
- For more details and the latest validation status of each drive, please make inquiries through "Contact us" in each region's website, <https://www.kioxia.com/>.
- Optional security feature compliant drives are not available in all countries due to export control and local regulations.

\*3 : DWPD: Drive Writes Per Day. One full drive write per day means the drive can be written and re-written to full capacity once a day every day for the specified lifetime. Actual results may vary due to system configuration, usage and other factors.

\*4 : Definition of capacity: 1 terabyte (1 TB) = 1,000 gigabytes (GB), 1 GB = 1,000,000,000 (10<sup>9</sup>) bytes

\*5 : A kibibyte (KiB) means 2<sup>10</sup>, or 1,024 bytes.

\*6 : Read and write speeds may vary depending on various factors such as host devices, software (drivers, OS etc.), and read/write conditions.

\*7 : IOPS: Input Output Per Second (or the number of I/O operations per second)

\*8 : Composite temperature reported by SMART.

\*9 : Dimensions represent the nominal values.

Customers must refer to and comply with the latest versions of all relevant KIOXIA information, including without limitation, this document, the specifications, the data sheets and application notes for Product and the precautions and conditions set forth in the KIOXIA Reliability Handbook and the instructions for the application with which the Product will be used with or for.

All information provided in this catalog is subject to change without any prior notice. For the latest and detail specification, please send an inquiry through "Contact us" in each region's website, <https://www.kioxia.com/>.

Product availability may vary by country. Please contact your local KIOXIA support for further information.
